Textual body of courtesy notification

A class action lawsuit has been filed in the U.S. District Court at Tampa, on the behalf of all fifty (50) States and Commonwealths, demanding the immediate termination of all abortion-on-demand, plus all government-sponsored contraception within America, and to cease all related federal and state taxpayer funding and programs of the same.

Planned Parenthood, nine (9) other formally named defendants, and all abortionists nationwide (Class Defendants), are blamed in fundamentally defrauding America, by using abortion-on-demand to deprive well over 50 million necessary U.S. consumers (1/6 of our consumer base) from existing, hence eventually collapsing our economy in direct manner, let alone the parallel tsunami lurking within the actuarial tables of all pension plans, securities derivatives, Social Security, and all other similar instruments.

The lawsuit claims for actual 2008 American "bubble crash" civil damages (\$14 trillion loss in housing market, \$7 trillion losses in personal wealth, and etc.), yet realizes the entire class of defendants only has mere token billions in assets for restitutions to our federal, state and local governments, not even remotely enough to satisfy a judgment.

Therefore, effective immediately, all appropriate federal, state and local governmental units may begin inherently-authorized seizures of all the defendants' facilities, assets, property, financial

accounts, and etc., nationwide, for clear national security reasons, and to secure at least minimal, token compensation of the expected historic judgment.

It is also expected that almost all governors, state legislatures, county commissioners, mayors, and city and town councils will begin quickly issuing their various emergency moratoriums and/or temporary legislative prohibitions against abortion-on-demand, in light of the merits in the newly-filed case, i.e., for national economic security reasons.

The lawsuit recommends that all such physical seizures be conducted by the local area government authorities (county, city, town), and that they be also allowed to keep the majority of all such assets, with some of those facilities and other properties converted for the resulting temporary increases in usage of adoption services across the country.

Several sub-classes of defendants are sued in general conspiracy with the abortionists destroying our economy, including the LGBT crowd (literally "in bed" with abortionists, i.e., on each other's Boards of Directors, and etc.), and such radical progressive liberal politicians, like both Obama and Romney, who have supported both the abortion and LGBT interplexed processes in falsely undermining the financial bedrocks of our nation.

Further, and because they are not only economically incompetent, but also historically immoral, routinely unethical, and consistently dishonest, a parallel petition within the case also demands the immediate disqualification and enjoinder of both Obama and Romney from official nominations at their party conventions for candidacy of any office in the 2012 U.S. General Election, and naming the two replacement sets of candidates, since the two main political parties must now each use a set of authentic pro-life and pro-traditional-marriage candidates to help ensure best public support (enough votes) within the upcoming election for President. Neither party's voter base must be forced to lose, simply because their faulty leadership's ringer candidate has been now directly implicated in the nefarious financial destructions of both America and the entire world.

In addition to terminating all taxpayer funding of abortion and contraception, economic relief is sought in two other forms: (a) phasing a modernized "gold standard" back as our U.S. Dollar base, using seven precious metals together as our new currency power within one fiscal year, then adding five rare earth metals in 2016; and (b), initiating an overhaul of all American government welfare and benefit systems nationwide, that not only pays for itself in cleansing out rampant fraud, but also generates over 140 million man-hours in volunteer help at tens of thousands of neighborhood churches across the nation, over \$3.5 billion in new non-perishable donations to the Feeding America and Operation Blessing food pantry networks, plus an IRS rebate check in the amount of \$500 issued out to every eligible federal taxpayer who participates within the program.
